SUMMARY

Senior Product Designer with 15 years of experience designing complex digital products, including over a decade working on financial and web3 systems where security and clarity are critical.
Experienced in owning ambiguous problem spaces from discovery through launch, translating complex technical constraints into usable products in close partnership with product and engineering.

EXPERIENCE

Independent Product Designer

2025 - Present

Design and product strategy for early-stage startups, with a focus on web3 infrastructure and AI-assisted product development.

Thrive Protocol
A platform that automates treasury allocations to builders creating value in web3 ecosystems. Designed and shipped a data-heavy product for proposal evaluation and treasury allocations, working closely with founders and engineering. The product was built entirely using AI-assisted development tools (Lovable).

TokenFoundry (Independent Project)
Experimental tooling that converts design tokens into production-ready UI systems. Built a Figma plugin and preview website that generate React+ Tailwind design systems directly from tokens.

Thesis/Mezo Economy - Design Lead

2024 - 2025

Helped secure $150M in Total Value Locked by designing key user experiences for Mezo, a Bitcoin Layer 2 focused on unlocking utility for BTC holders.

- Owned end-to-end design for Mezo's Points Portal, Testnet, and Mainnet DeFi economy experiences, defining core user flows and interaction patterns
- Designed trust-critical BTC deposit flows and clarified points vs tokens to reduce user confusion in a high-risk financial system
- Partnered with product and engineering to define requirements, explore tradeoffs, and ship production-ready UX

Thesis/Taho - Lead Product & Brand Designer

2021 - 2024

Led product design for Taho, a browser-extension wallet, from the initial concept to the fully operational product with 150,000 active users.

- Sole Product Designer owning the browser extension, web experience, design system, and brand
- Partnered with founders and Head of Product, taking on de-facto product responsibilities including feature prioritisation
- Built and evolved a scalable design system, enabling faster iteration and consistent UX across surfaces

Vlad Todirut Senior Product Designer

www.vladtodirut.design linkedin.com/in/vladtodirut vlad.todirut@gmail.com

EXPERIENCE

- Identified and prioritised high-impact UX improvements based on user feedback, analytics, and security considerations
- Supported growth to approximately 150,000 active users through continuous usability improvements

ConsenSys - Product & Brand Designer

2015 - 2020

Joined as the company's 2nd product designer, helping to launch and grow over 30 blockchain initiatives

- Delivered the first full UX/UI pass for **MetaMask,** helping shape its foundational user experience
- Deeply owned design for ~10 products and contributed to 30+ blockchain initiatives
- Co-founded Ujo Music, guiding UX priorities and product decisions under tight timelines
- Operated in a fast-moving, design-mature environment, helping establish early UX patterns and design standards across teams

Freelance & Agency - UX/UI and Brand Designer

2009 - 2016

- Designed websites, web applications, and digital experiences for a range of global clients across consumer and B2B domains
- Developed strong foundations in UX, visual design, and client collaboration across fast-paced, deadline-driven environments
- Worked with brands including IKEA, Heineken, and McDonald's Desperados

SKILLS

Product Design Strategy
Complex Systems UX
Design Systems
UX & Interaction Design
User Research & Validation
Information Architecture
Accessibility
Cross-functional Collaboration

TOOLS

Figma, Framer, FigJam, Adobe Creative Suite, Maze, UserTesting, Typeform, GitHub, Linear, Jira, AI -assisted dev tools (Claude, Lovable, Cursor)

EDUCATION

MA Visual Arts
Arts and Design University - Timisoara, 2010
